

# Android UI size guide

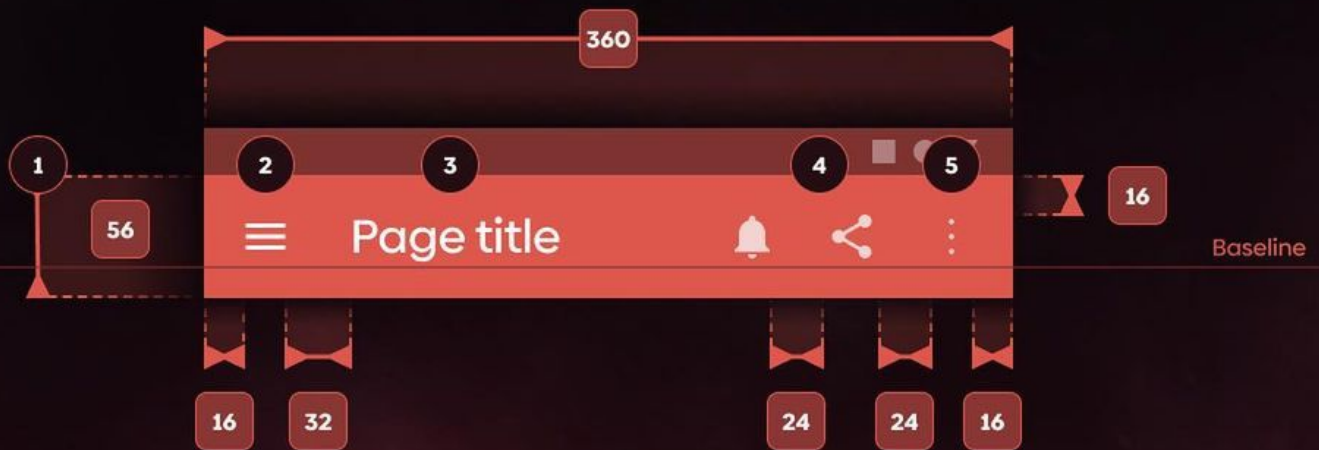

# Android app screens most often **consist of 4 parts:**

# App bar / Navigation bar

## Placement

- ⚡ **Menu** icon on the far left
- ⚡ **Titles** to the left, after the menu icon (if one exists)
- ⚡ **Actionable icons** on the right side
- ⚡ **Overflow menu** to the far right

- ① Container
- ② Menu icon (optional)
- ③ Title
- ④ Action items (optional)
- ⑤ Overflow menu (optional)

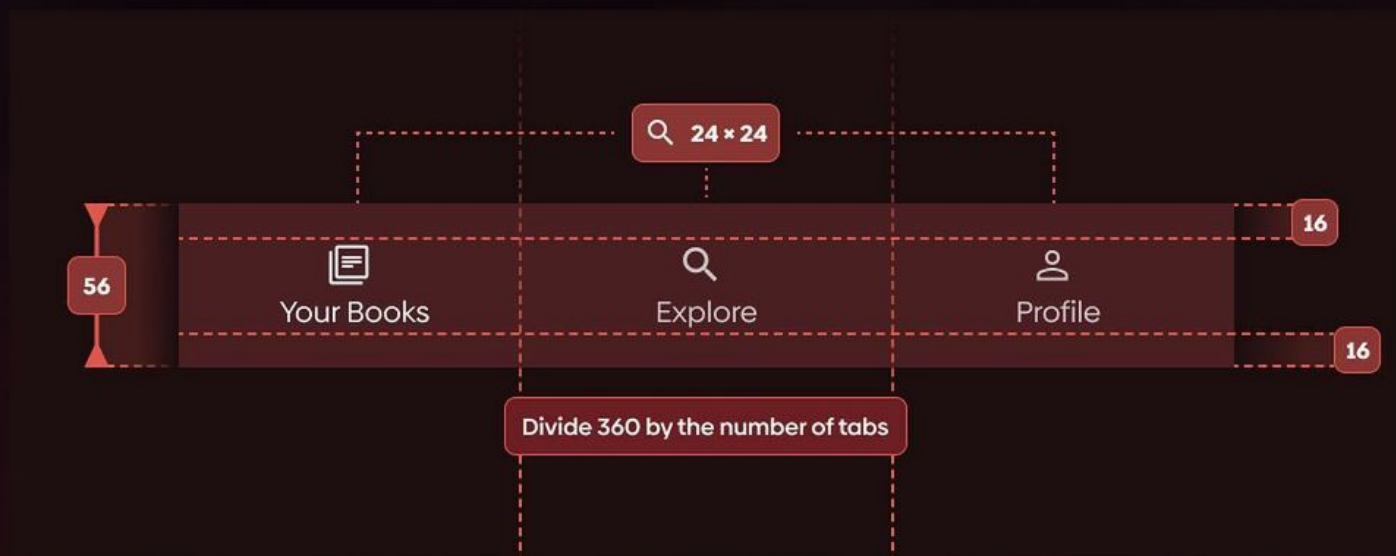

# Bottom Navigation bar

**2-5 tabs**

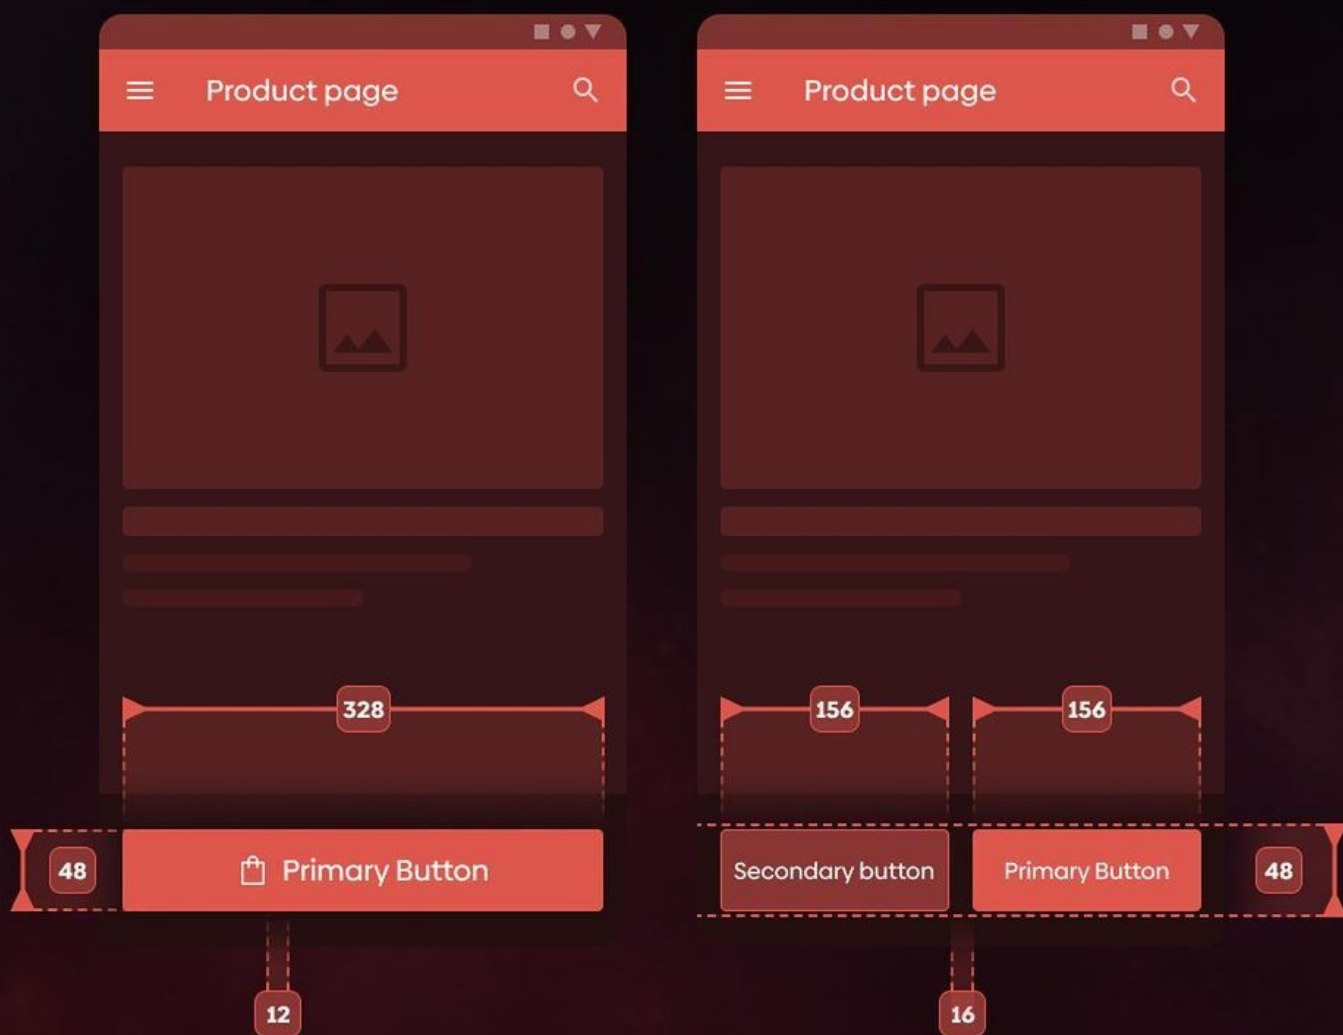

**Use icon labels** if possible

# Buttons

- ⚡ **Tappable areas:** recommended at least **48×48dp**
- ⚡ If you're going smaller, separate the other tappable elements to ensure a tappable area of at least 48dp
- ⚡ **Separation of 2 buttons:** at least 16dp

# Buttons

---

## Minimum sizes

- ⚡ **Primary buttons:** 40 - 56 dp
- ⚡ **Secondary buttons:** >32 dp
- ⚡ In 48dp high button, 14-16 font sizes look best, 12-13 for capitalized labels

**size:** 16px, **line-height:** 24px,  
**letter spacing:** 0%

**size:** 12px, **line-height:** 16px,  
**letter spacing:** 6%

# Margins

---

- ⚡ **Space between** content and the left and right edge of screen
- ⚡ Margin **width can change** at different breaking points
- ⚡ At a breakpoint of 360 dp, use 16 - 24dp margins
